

Aerfresco®

“A well vented and freestanding additional catering space”

Benefits of Aerfresco® include:

- **Catering for smokers:** although it is outside and freestanding, it also has additional venting in the roof. Perfect for hosting smokers (especially for restaurants and bars) and accommodating changes to the Smoke Free Environments Act
- **Extra space:** extends your indoor area. A fantastic option for catering for special events or private functions
- **Permanent:** is available when you need it because it's a permanent fixture. There's no need to put it up and take it down
- **Enjoy being outside:** it provides outdoor living within the protection of an inside area
- **Enjoy the view outside:** by choosing clear PVC for the side curtains, you can continue to enjoy the view outside
- **Don't worry about the weather:** you can continue with your plans to host an event without any concerns for the weather. If it's sunny, lift the sides up or if it's raining and windy, leave the sides down.

Single module

Double module

Other features include:

- **Lifting side curtains:** each side is fitted with a wind-up gearbox to make them easy to lift up
- **Heating & lighting:** a number of options are available. Please ask for further details
- **Frame finish:** all frames are powder coated
- **Size:** the size of a module is 4 x 4 metres. The size of your Aerfresco® can be increased by adding further modules
- **Materials:** can be made of PVC or Dri-Z waterproof shade cloth. Both materials are available in a wide choice of colours.
