

Aerospan[®]

“The latest technology in providing shade or rain protection over a large area”

Benefits of Aerospan[®] include:

- **Added safety:** requires less posts to cover a large area. It provides maximum cover using minimum poles
- **More flexibility:** is free standing giving you more options for placement
- **Stylish:** a contemporary and attractive option for providing sun and/or rain cover over a large area
- **Durable:** because of its shape and design it is more difficult to climb on and therefore less susceptible to vandalism
- **Unique:** it is the latest in shade technology and offers maximum shade cover and a stylish design
- **Rain or shine?:** is available for cover from either the rain or sun, or both
- **Versatile:** because it's modular we can add to it to meet your size requirements.

size: 6m x 9m

Other features include:

- There's up to 19 designer shade cloth colours to choose from
- Cover fabric is available in shade, waterproof shade or PVC
- The posts can be galvanised, powder coated or painted.
