

Pole Protectors

“Making your playground
a safe place for children to enjoy”

Children in the playground are busy running around and having fun. But sometimes they aren't always looking where they are going. Pole protectors in your playground make it extra safe by minimising the chance of a collision with a pole and therefore injury.

Other features include:

- Protectors can be made to fit any pole circumference
- Protectors are held together by a zip rather than Velcro. This ensures a better hold
- Protectors are made from PVC and a wide choice of colours are available.
